SQL & Database Management

UI/UX Design Principles

Haris Tariq

Web Designer & Developer

Lahore, Punjab, Pakistan

Summary

I am a passionate and visionary Web Designer & Developer with 2 years of dynamic experience in building immersive digital experiences. My journey began with a fascination for clean, intuitive design and evolved into a strong command of full-cycle website development. From front-end design to back-end logic, I bring precision, creativity, and a user-first mindset to every project.

Armed with a degree from COMSATS University Islamabad, I've led the design and development of websites that are not only aesthetically refined but also structurally robust and scalable. I specialize in blending technology with design, ensuring that every site I create is not only beautiful but also fast, secure, and efficient. With hands-on knowledge of SQL databases, UI/UX design principles, and a knack for maintaining high-performance websites, I thrive in environments that demand innovation and quality.

In addition to my technical acumen, I excel in collaboration, communication, and continuous learning. Whether managing content, resolving bugs, or delivering custom solutions, I always aim to exceed expectations and deliver real value.
